PROFILE

Business analyst and AI evaluation specialist who turns complex information into clear decisions. I evaluate AI output against rubrics and guidelines, document errors and edge cases with written rationale, and build SQL, Power BI and Python analyses that lead to clear recommendations.

EXPERIENCE

Video Annotation Specialist (Robotics) · Micro1 AI · Remote — Aug 2026 – Present

- Review robotic motion datasets against structured quality guidelines, write feedback to improve training-data accuracy, and escalate edge cases with documented rationale.

Video Annotation Specialist (AI Evaluation) · Turing · Remote — Jun – Jul 2026

- Annotated and evaluated video-based AI training data using structured rubrics, writing assessments of edge-case reasoning and annotation decisions.

Video Data Reviewer · Micro1 AI · Remote — May – Jun 2026

- Reviewed video content for AI training pipelines against rubrics, documenting anomalies and writing structured notes on borderline cases.

Data Analyst Intern · HNG Internship · Remote — Apr – May 2026

- Delivered a MySQL data warehouse with ETL and data-quality checks (Palladium Bank) and a Power BI sales report with written recommendations (Northwind Traders).

Business Analyst, AI Evaluation Specialist · Turing · Remote — Oct 2025 – Mar 2026

- Evaluated LLM output for factual correctness, hallucinations and logical consistency using rubric-based assessment.
- Designed adversarial tasks targeting model overconfidence, and traced reasoning chains to diagnose failure mechanisms.

Financial & Customer Insight Analyst (part-time) · Onibuore Event Management · Ogun State — Mar 2021 – Sep 2024

- Analysed customer records with Python and Excel, built Power BI dashboards for bookings and marketing, and ran root cause analysis on churn and event performance.

SELECTED PROJECTS

Northwind Traders Business Intelligence Report — Power BI · DAX
Power BI report and written analysis of $1.27M revenue from 830 orders and 89 customers in 21 countries.

Palladium Bank Data Warehouse & Transaction Analytics — MySQL
Star-schema warehouse for 18 months of transactions, with ETL, data-quality checks and documented design decisions.

IBM Employee Attrition Analysis — Power BI · DAX · Excel
Attrition rates by role, department, age, gender and work-life balance for 1,470 employees in a public HR dataset.

Crop Yield Prediction — Python · scikit-learn
Regression pipeline on 1 million records: R^2 of 0.91 on held-out data, consistent across 4-fold cross-validation.

SKILLS

AI evaluation	Rubric-based evaluation, guideline adherence, error and hallucination identification, edge-case escalation, written rationale
Business analysis	Problem framing, requirements and acceptance criteria, process-gap analysis, evidence-graded recommendations
Data	SQL (MySQL), Power BI, DAX, Excel (Power Query, Power Pivot), Python (pandas, scikit-learn), star-schema modelling, data-quality checks

EDUCATION

MBA (in progress, expected 2027)
Lagos State University

B.Sc. Human Anatomy
Bowen University

CERTIFICATIONS

Oracle Data Platform 2025 Certified Foundations Associate
Oracle · Oct 2025

Data Science and Analysis Professional Course
Tech Studio Academy · 12 weeks · Jun 2025

IBM Data Analyst Professional Certificate
IBM via Coursera · 2025

BCS Foundation Certificate in Business Analysis
